

Aerocom phase II

Are we doing something wrong??

- CMOR Aerocom Model Output / Emphasis on diagnostics
- Priorities for experiments? / Modeller commitment
- AeroCom datasever // dods server // website
- Working groups (microphysics, absorption, forcing, organics, dust, vertical, indirect, hindcast) Integration/Joint analysis
- Observational database access (NILU, NASA, individuals)
- Steering group (Chin, Kinne, Schulz)
- Annual meetings (Oxford next) // subgroups meet? telecons?
- wiki page // aerocom-modeller email list
(discussions on emissions, protocol, timeline...)
- Joint Papers & Database user papers ?
- Gentleman data policy
- No specific funding

Thanks Paul & gfd
