AeroCom Control 2015

Contact: Michael Schulz (MetNo), michael.schulz@met.no

Experiment Description and motivation:

The model versions used for the different experiments are often not easily comparable. New model versions should be documented regularly to establish a state of the art comparison yearly. For this purpose AeroCom offers a semi-automated platform with identification via the AeroCom webinterface. Evaluation with surface observations and Aeronet observations will complete the documentation of emissions, re

Deadline for model submissions to be analysed before the Frascati instructions below.

Experiment name: AP3-CTRL2015

Output requested (2D fields, Monthly averages, preferably year 2010 meteorology):

- EMI Emissions: BC, OA, SO₂, DMS, NO_x, VOC, DUST, SS
- LOAD Column Loads: BC, OA, SO₄, NO₃, DUST, SS
- SCONC Surface concentrations: BC, OA, SO₄, NO₃, DUST, SS
- DEP Total Deposition: BC, OA, SO₄, NO₃, DUST, SS
- OD550 Aerosol optical depth @550nm: AER, OA, SO₄, NO₃, DUST, SS

The directory /media/scratch/incoming/AEROCOM-P3-AUTO-UPLOAD allows for automatic incorporation into the AeroCom database and workup. Uploaded files are processed automatically by the AeroCom tools and transferred into the AeroCom phase III data directory.

If correct in format and with correct filenames, results uploaded here will be processed over night and appear after few days as image catalogue on http://aerocom.met.no/cgi-bin/aerocom/surfobs_annualrs.pl?PROJECT=AEROCOM&MODELLIST=AEROCOM-Phase-III

Short Recipe (Long version: https://wiki.met.no/aerocom/data_submission)

- 1) Name files according to HTAPII/AeroComPhaseIII standards. One file per year and variable
aerocom3_<ModelName>_<ExperimentName>_<VariableName>_<VerticalCoordinateType>_<Period>_<Frequency>.nc
for example
aerocom3_GOCART-AP3-CTRL2015_od550aer_Column_2010_monthly.nc
- 2) Check for cf compliance some files (<http://aerocom-test.met.no/upload>)
- 3a) obtain account on aerocom-users server
3) create directory on aerocom-users server:
/media/scratch/incoming/AEROCOM_AUTO_UPLOAD/(MODELNAME)/renamed/
Use exactly the same model name as used for file names. Attention to lower&upper case!!
- 4) Put files directly into this "renamed" directory.

See this and Michael's talk

*More initiatives will be proposed during this workshop
On Size evaluations, Perturbations, Semi-direct effect,
Satellite data evaluation, ...*

Formatting ?? Has improved !!

<p>ESA-official V. Eyring Schulz, Collins, Lamarque P. Forster</p>	<p>welcome CMIP 6 goals and status overview of AerChemMIP RFMIP</p>
--	---
- 10:00 - 11:00 **ALL** *discussions with AerChemMIP chairs*
- 11:00 - 11:30 coffee-break
- 11:30 - 12:15 **SESSION 8 emission (input)**

<p>S.Smith M.Hegglin</p>	<p>historical and future emissions tropospheric and stratospheric ozone data</p>
------------------------------	--
- 12:15 - 12:45 **ALL** *needed model input - discussions with AerChemMIP chairs*
- 12:45 - 13:15 **SESSION 9 aerosol forcing fields (input)**

<p>G.Myhre S.Fiedler</p>	<p>AeroCom2 Model Median data-sets Aerosol Plume climatology (MACv2-SP)</p>
------------------------------	---
- 13:20 - 14:30 lunch
- 14:30 - 15:30 **SESSION 10 AerChemMIP simulation plan**
ALL *experiments and diagnostics - discussion with AerChemMIP chairs*
- 15:30 - 16:00 coffee
- 16:00 - 17:30 **SESSION 11 AerChemMIP science talks (12 +3 min)**

<p>M. Bollasina C. Randles A. Voulgarakis K. Bowman T. Shepherd C. Timmreck</p>	<p>Atmospheric circulation as mediator of aerosol-driven climate impacts MERRA Version 2: the Goddard aerosol reanalysis 1979 to present Local and remote climate effects of regional pollutant emissions Emergent constraints in chemistry-climate interactions The climate impact of changes in halocarbons and CO2 in tropical UTLS Coordinated climate response for stratospheric aerosol</p>
---	---
- 17:30 - 19:00 ESA sponsored **ICE-breaker and poster viewing**

Task: Reflect on and Recommend an AeroCom work plan
Produce a written recommendation at each AeroCom workshop on how to go on, Track and review progress in AeroCom working groups

Members – Appointed each year anew at AeroCom workshop

Proposed members

Working group leaders, Model representatives, Co-Chairs

Nitrate Bian / BB Petrenko / Dust Balkanski / Microphysics Mann

Aerosol Cloud Interactions Ghan, Liu

Direct radiative forcing Myhre, Samset

GCMs Takemura CTMs Chin

COSP simulator Stier / Satellite data Kahn, Holzer-Popp

Aircraft simulator Schwarz, Stier, Chen

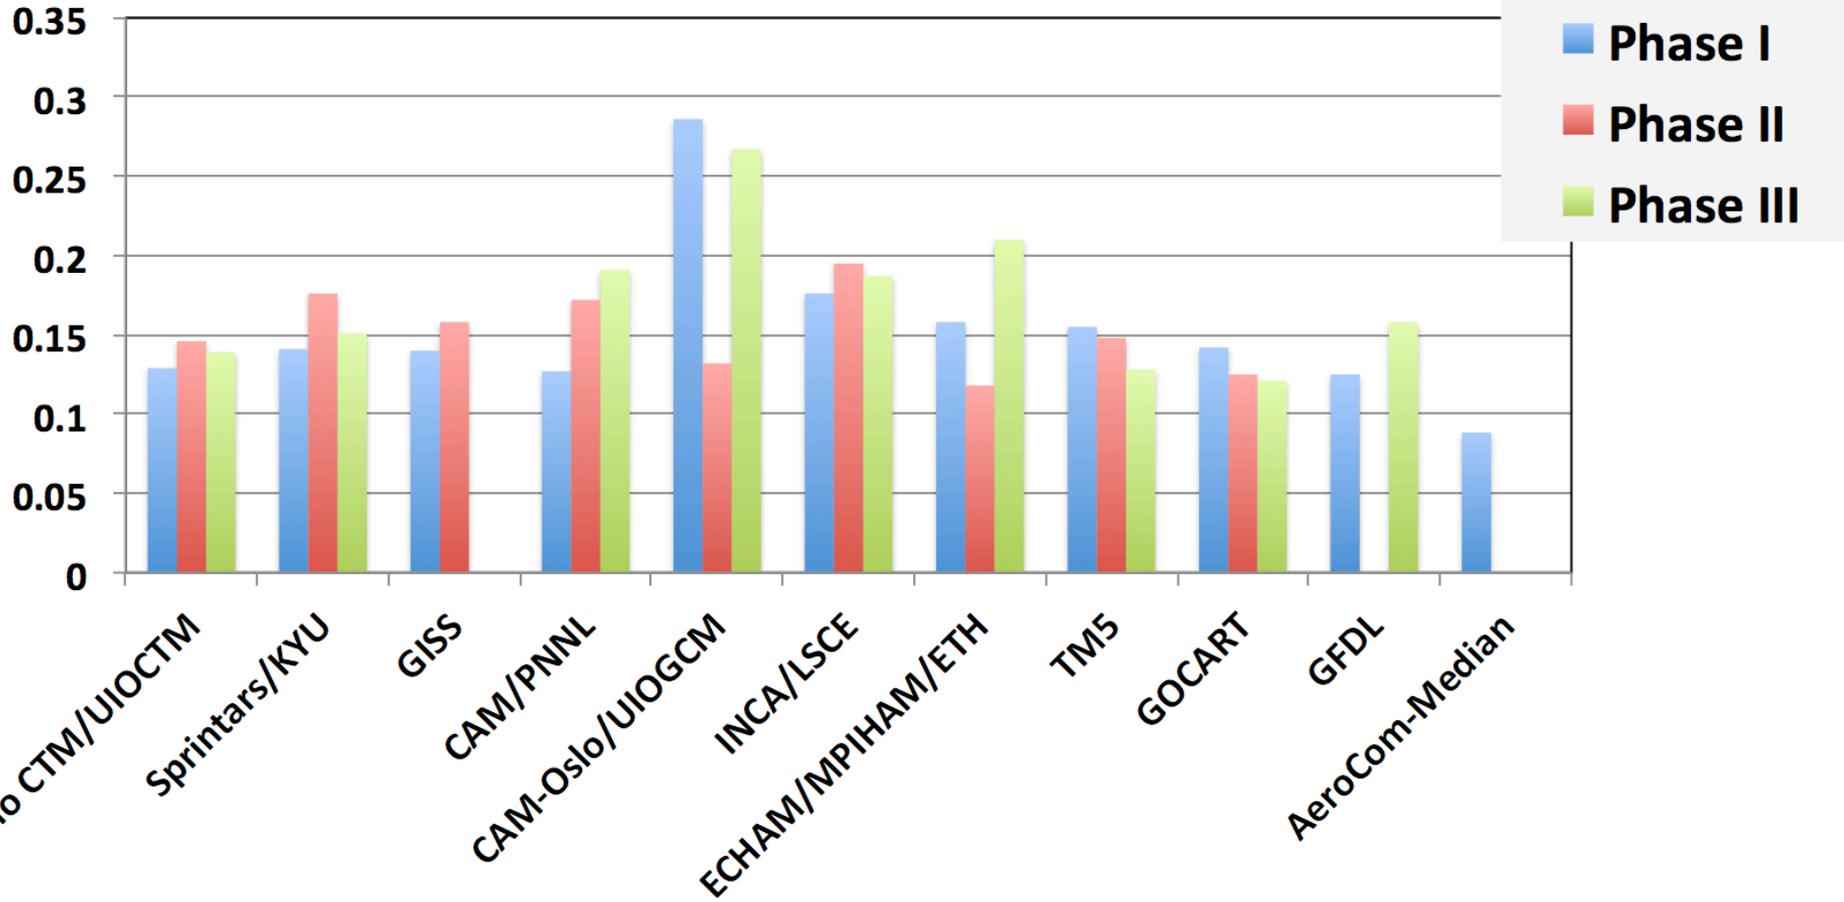

Surface data Ogren, Schulz / Co-chairs Schulz, Kinne, Chin

Challenge: To improve (most) models

RMS Model versus AOD from Aeronet (2000/2006/2010)

The CTRL 2016 experiment

Rewarding the best OD550 performing **model team**
With Two Bottles of Champagne (chinese and french)

Requirement :

Simulation of daily AOD in 2010

and its speciation (BC, SO₄, DUST, OA, SS, Rest)

Submission 15. September 2016

Funding: Crowdsourcing campaign soon to be launched

Jury: MMS+SSC

Meteorologisk
institutt

Acknowledgement

ESA , Simon Pinnock,

Mian Chin, Stefan Kinne

Jan Griesfeller, Anna Benedictow, Augustin Mortier

Norges Forskningsradet funding “AeroCom P3”

AeroCom modellers and community

Thanks for your attention !
