

Merging aerosol optical depth (AOD) and AOD trend estimation from multiple satellite missions for the last four decades

Larisa Sogacheva + AEROSAT team
AEROSAT, 18th October 2018

Objectives

- The expected lifetime of the satellites is about 10-15 years. To study the longer trends of the substances using satellites, the information from different satellites should be combined.

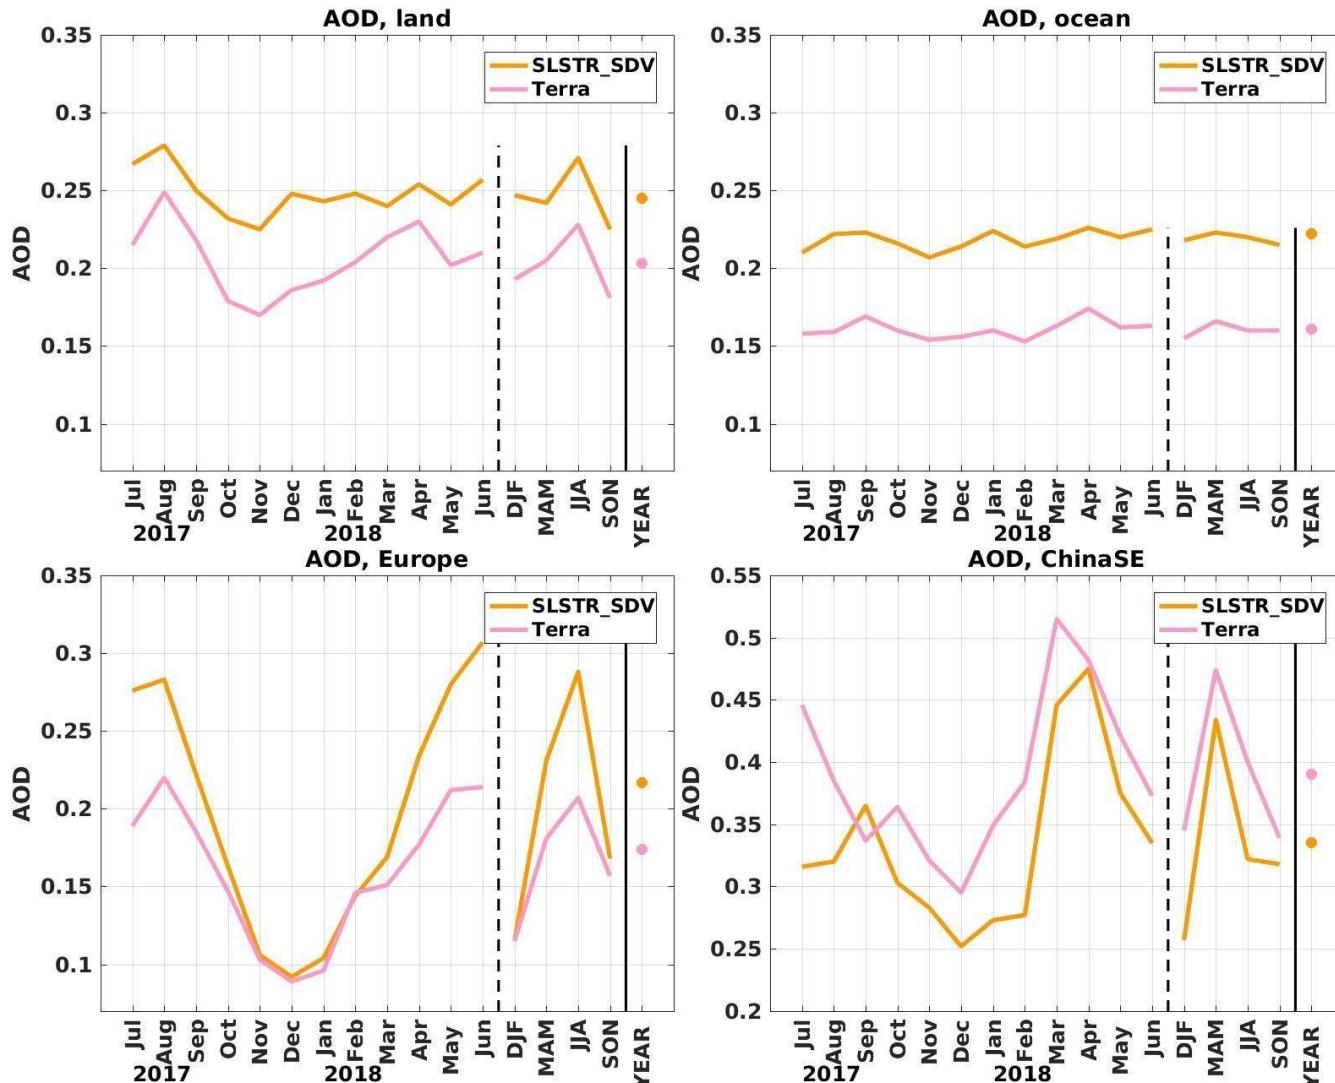

FINNIS

Instruments/Algorithms

| Instrument | period | Algorithm | coverage | Version |
|--------------|---------------------------------------|-----------|----------------------|-------------|
| TOMS | 1979-2001, gaps | OMAER | land / ocean (parts) | Sept. 2018 |
| OMI | 2005-2016 | OMAER | land / ocean (parts) | Sept. 2018 |
| AVHRR | 1991-2011, gaps | SOAR | land / ocean | 001 |
| SeaWiFS | 1996-2010 | SOAR | land / ocean | 1.0 |
| VIIRS | 2012-> | SOAR | land / ocean | Summer 2018 |
| ATSR2/AATSR | 1995-2002-2012 | ADV | land / ocean | 2.31 |
| | | SU | land / ocean | 4.3 |
| | | ensemble | land / ocean | 2.6 |
| MODIS, Terra | 2000-> | NASA | land / ocean | 6.1 |
| | | MAIAC | land / ocean (parts) | Sept. 2018 |
| MODIS, Aqua | 2000-> | NASA | land / ocean | 6.1 |
| | | MAIAC | land / ocean (parts) | Sept. 2018 |
| MISR | 2000-> | | land / ocean | 2.3 |
| PARASOL | 2005-2013 | GRASP | land | Summer 2018 |
| EPIC | 2016-> | MAIAC | land | Sept. 2018 |
| | To be included : SLSTR, Himawari, ... | | | |

SLSTR SDV AOD, 07.2017-06.2018 comparison with Terra AOD

AOD data specification

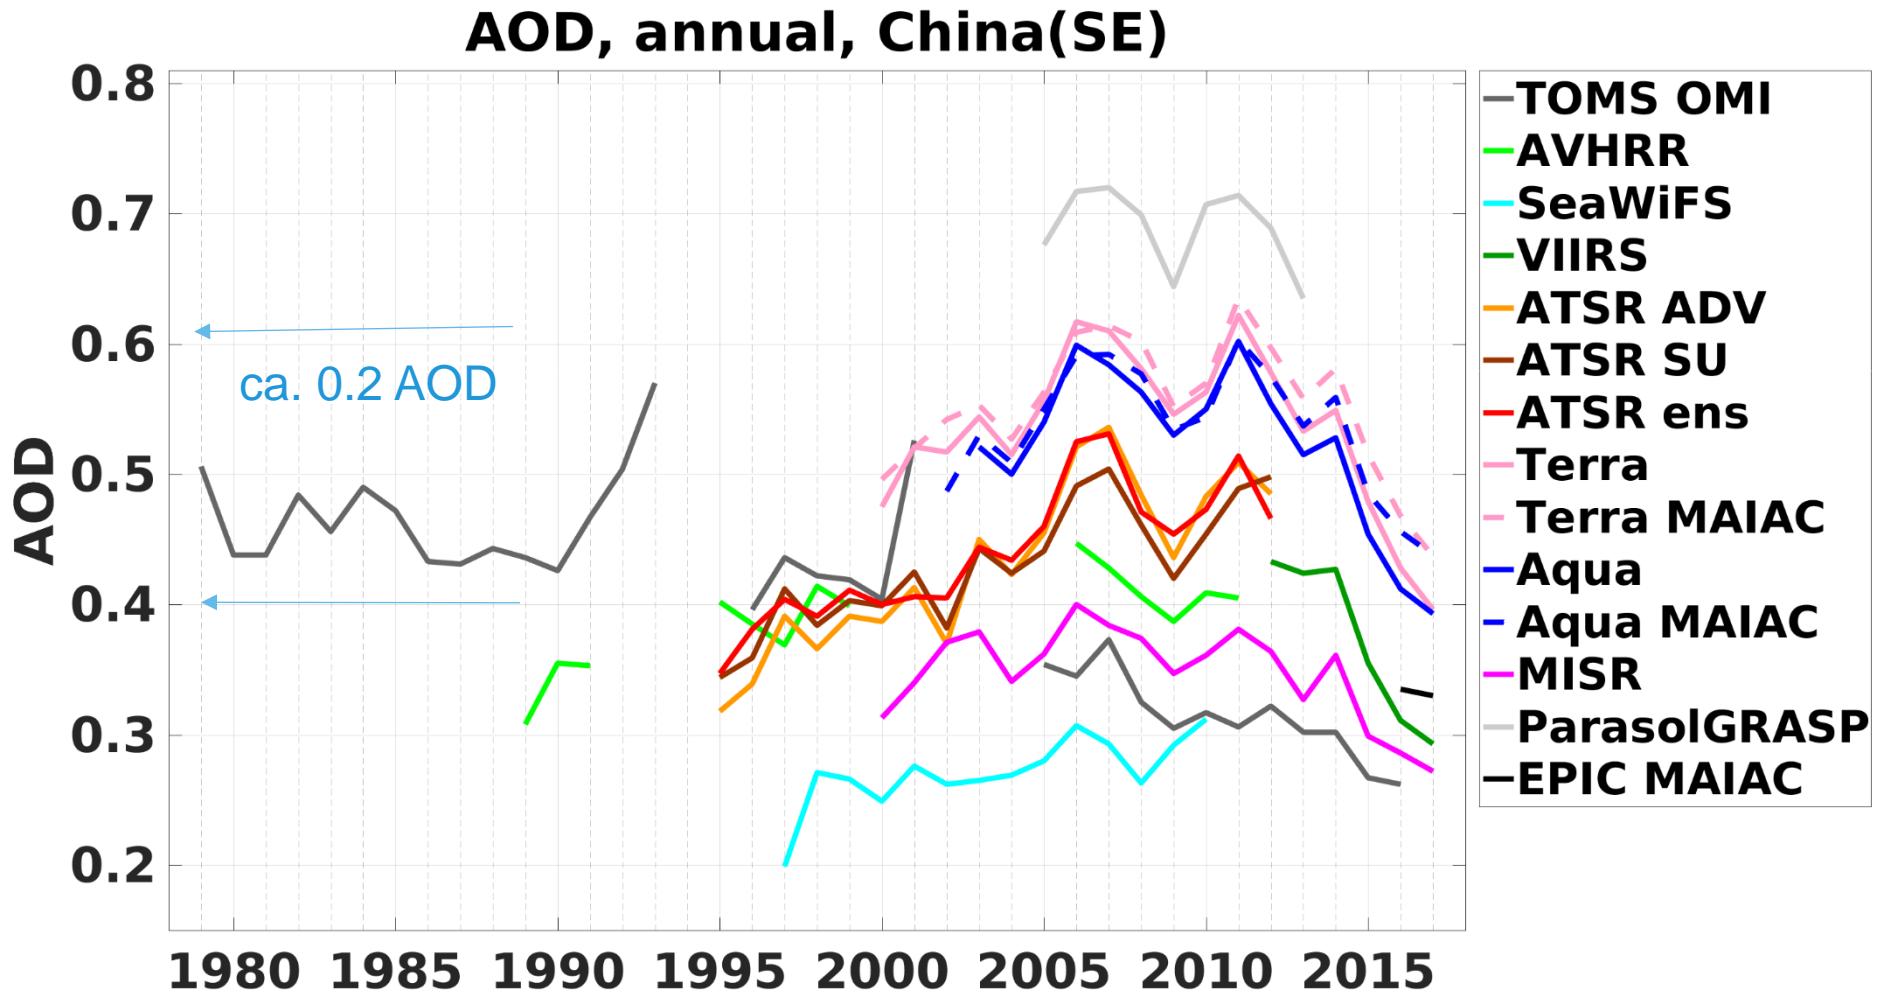

- AOD monthly L3 ($1^{\circ} \times 1^{\circ}$ resolution), global
- AOD monthly-> seasonal, AOD monthly-> yearly
- AOD uncertainties – to be included

AOI

- China, SE
- Europe
- Global, land
- Global, ocean
- tbd

THANKS for all data providers!

- Please keep me informed about the next version release
- Please, send me key publications, where algorithms/datasets/validation results are discussed
- All figures/results will be in GoogleDrive

Conclusions

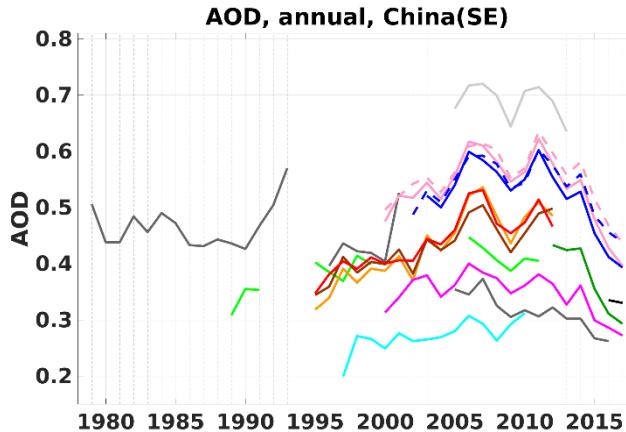

- WORK IN PROGRESS
- Difference (spatial, temporal) between AOD data sets exist
- Roughly (no statistics yet) estimated difference between yearly AOD from different data sets

| land | ocean | Europe | China, SE |
|------|-------|--------|------------------------------|
| 0.04 | 0.05 | 0.06 | 0.20 (0.30 for seasonal AOD) |

- Comparison with AERONET monthly means
 - For AOD>1, both fine and coarse, almost all data sets are lower than AERONET
 - For AOD<1, coarse, Terra and Aqua meet the AERONET best; OMI, SeaWiFS, ATSR SU, MISR are lower than others
 - For AOD<1, fine, TOMS is higher, MISR and MAIAC-family is lower

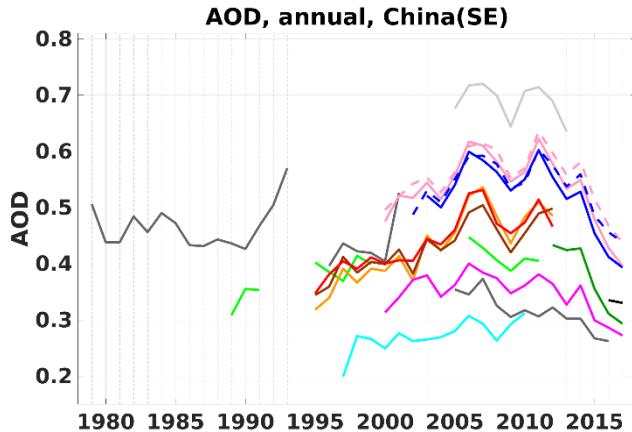

?????????

- Should we go to higher time resolution, L3 daily? (needed for modelers). Choose 2 years for the intercomparison (e.g., 2008 and 2018). Funding needed.
- Is merging needed? Yes, for trends estimation.
- Is seasonal scale is enough?
- Is merging possible? How to proceed further
- AOD trend estimation (after merging, if possible)
- More...
